

# GUIDELINES FOR POSTER PRESENTATION

The specifications for Posters Presentation are as follows:

## Poster board dimensions:

The maximum available dimensions of the **portrait** poster board are 946mm (w) x 1938mm (h)

We recommend that you use A0 portrait which is 841mm (w) x 1189mm (h)

1. We suggest you design your poster using the following sections: Title, author, and address (at upper edge, across the width of the whole poster).
  - Purpose
  - Methods
  - Results
  - Conclusions
2. Keep text to a minimum, emphasise graphics, and make sure every item in your poster is necessary.
3. Posters must correspond directly with the original abstract submitted.
4. Posters must be written and presented in English.
5. The use of colour makes the poster more effective and attractive. When choosing a background, remember that neutral or grey colours will be easier on the eyes than a bright color. In addition, colour photos look best when mounted on grey.
6. Materials should be mounted on thin poster paper or lightweight cardboard (Do not use heavy cardboard, which may prove difficult to secure to the poster board).
7. Poster numbers will be indicated at each panel. Posters will be affixed with double-coated tape and these materials will be provided. No pins or tacks will be allowed.
8. Bring your acceptance letter and meeting registration badge to gain access to the poster area for placing your poster. The Scientific Advisory Committee would like to give the opportunity to poster presenters to meet with delegates who may have questions and would like to know more about the work presented. In order to facilitate this process, poster tours will take place during the congress. Each poster presenter will be contacted with the details of their session.
